THE WORLD'S MOST ADVANCED BUSINESS JET.

Why is the world's first composite super-midsize business jet also the *Robb Report* 2008 "Best of the Best" winner? Revolutionary composite technology is just part of the story. Complementing the advantages of composite weight savings, greater speed and intercontinental range is a large, spacious cabin, making the Hawker 4000 the leader in super-midsize business jets. And Hawker is the only manufacturer with its own master cabinetmakers who

bring peerless craftsmanship to a luxurious interior that accommodates up to eight passengers in stand-up, stretch-out comfort. No other aircraft offers state-of-the-art technology and state-of-the-art luxury. The Hawker 4000: First in its class. First in the world. Learn more at HawkerBeechcraft.com or call 800.949.6640
