PRESS RELEASE

Talon Air, Inc. Adds A Second Challenger 604 Heavy Jet To It's Growing Private Jet Charter Fleet

Farmingdale, New York – April 2010: Talon Air, Inc., a worldwide leader in private aircraft management and luxury private air charter, announced today that it has recently added a Bombardier Challenger 604 to its fleet of modern business jets. The addition of this large cabin aircraft is part of the company's continued expansion to serve its customers. The aircraft is based in Miami, Florida.

“Strategically basing a large cabin aircraft in South Florida will help Talon Air meet the increased demand for both domestic and international flights originating from this area.” said Jason Sanders, Senior Vice President. “By opening this base we will be better positioned to serve our customers and the Florida community.”

The Challenger 604 offers the widest private jet cabin in its class with spacious seating for up to ten passengers. With speeds up to 540 mph at 41,000 feet, this private aircraft is one of the most comfortable and efficient large cabin business jets available for air charter. The Challenger 604 features an oversized baggage compartment designed to transport skis, golf clubs, or a variety of other passenger luggage, making it a great fit for both personal and business travel.

Talon Air continues to strategically grow its private jet fleet through aircraft management agreements. Unlike fractional aircraft agreements, Talon's customized Aircraft management agreements are an attractive option for aircraft owners and corporations who want to lower the cost of aircraft ownership, and generate air charter revenue when the aircraft is not being used.
